

MF BAR CONTAINER SECURITY SEALS

Used for shipping and intermodal containers, this heavy-duty barrier seal features a locking mechanism embedded in the groove in the metal bush, which makes the seal stronger and more difficult to tamper with. Identical sequential numbers on the bar and bolt seal provide greater security. Specify company name and consecutive numbering.

- C-TPAT-compliant; meets ISO/DIS 17712:2006 (e) specifications
- High-strength steel
- Tensile strength: 2,645 lbs.

TOPP CLIP®

Protect palletized cargo from tampering. Featuring a 4-prong, solid steel locking mechanism to secure pallet strapping, apply the seal as the final step in pallet construction. Extraction or replacement of the bands is impossible without easy visual recognition. A standard tensioner and crimper are the only tools needed.

- Durable metal seal with plastic tag
- Starter kit: 50 sets of Topp Clips®, 50 Top Seals, 50 warning labels
- Master carton: 200 sets of Topp Clips®, 200 Top Seals, 200 warning labels
